The N	IAILING DATE of this communication	appears on the co	ver sheet with the c	orrespondence address	;				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 2-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is an indefinite negative limitation. Positive terminology should be used to assure that determination of claim coverage is clear.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 1, 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art as admitted by applicant in view of either Reutter or Bohm et al..

Application/Control Number: 10/678,711 Page 3

Art Unit: 3612

The prior art as admitted by applicant lacks the mesh side shield using a solid structure. It would have been obvious to one of ordinary skill to provide in the prior art as admitted by applicant a mesh material at a side opening as taught by either Reutter or Bohm et al. in order to lessen the effect of wind turbulence within the vehicle.

5. Claims 1-3, 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese document 2001-180285 in view of either Reutter or Bohm et al..

Japanese document 2001-180285 lacks the use of mesh material. It would have been obvious to one of ordinary skill to provide in Japanese document 2001-180285 mesh material as taught by either Reutter or Bohm et al. in order to lessen the effect of wind turbulence within the vehicle.

As to claim 2, the shield of Japanese document 2001-180285 is smaller at front.

6. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art as admitted by applicant in view of Reutter or Bohm et al. as applied to claim 1 above, and further in view of Japanese document 2001-180285.

It would have been obvious to one of ordinary skill to provide in the references above a non-rectangular shape to the side shield as taught by Japanese document 2001-180285 in order to conserve the expense of extra material as the side opening is substantially triangular, not rectangular.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/678,711 Page 4

Art Unit: 3612

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese document 2001-180285.

The drive mechanism is shown as well as the smaller forward dimension.

As to claim 9, see bar 43, figure 9.

As to claim 10, see figure 6.

9. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese document 2001-180285.

It would have been obvious to one of ordinary skill to provide in the reference above side shields at both sides to be fully effective.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taguchi, Paerisch et al., and Hertel et al. are cited to show other side shields.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (703) 308-2178.

The examiner can normally be reached on 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn D. Dayoan can be reached on (703) 308-3102. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
